# ELECTROLYTIC POLISHER & ETCHER QETCH 1000

The Qetch 1000 is a fully automatic electrolytic polisher and etcher with intuitive touch-screen operation. Polishing and etching unit and control unit are separated, also the Qetch 1000 can be used in the lab fume cabinet. A scan function displays the current voltage curve of a material and provides polishing results quickly without structural changes. Handling of the polishing and etching unit was facilitated significantly by the interchangeable l ltr. electrolytic tanks. Different electrolytes can be changed and easily stored with lid. The unit is cleaned with water by a washing program.

#### The drift is cleaned with water by a washing progra

#### EASY OPERATION

Qetch 1000 provides maximum safety and flexibility for the user during the polishing & etching process by intuitive touchscreencontrol. Separation of polishing & etching unit from control unit enables operation within a lab fume cupboard.

Option for connecting an additional and an external etching unit increases time saving applications. The chemical-resistant plastic vessels, also for storage of the electrolytes, are quick and easy to change.

#### **TOUCHSCREEN-CONTROL**

The QATM touchscreen surface allows intuitive operation even with gloves.

Up to 200 programs with all parameters can be stored and protected with password (incl. labelling field).

#### POLISHING AND ETCHING UNIT

The chemical resistant coated stainless steel housing has a large polishing table and can also be used separated from the control unit, e.g. in a lab-fume cabinet.

#### **BASIC MODULE**

#### **Qetch 1000 CONTROL UNIT**

- I intuitive operation via QATM Touchscreen surface, even with gloves
- I up to 200 programs with all parameters storable, protected per password (incl. free labelling field)
- I current & voltage diagram in real time
- I scan function for displaying a current-voltage characteristic graph
- I USB interface for creating program backup I media preparation for connecting a polishing & etching unit and an external etching unit (optional: connection for 2nd polishing & etching unit)
- I variable output voltage and process duration I automatic cooling control for mains water or recooling (current supply via Qetch 1000)
- I Aluminium housing, powder-coated
- l e-lab ready

#### Order No.: M6202000

#### EQUIPMENT

**POWER SUPPLY** Equipment 1 230 V/50 Hz (1Ph/N/PE) Order No.: A6202000

#### **Equipment 2**

110 V/60 Hz (1Ph/N/PE) Order No.: A6202001

#### **POLISHING & ETCHING UNITS**

Equipment 1

- Polishing & etching unit I large polishing table incl. set of masks (5 pcs.)
- I touch-free pump drive (magnetic clutch) stainless steel start button with integrated LED status
- I exchangeable 1 ltr.electrolyte tank made from chemical-resistant plastic (incl. lid)

display

- I max. standard sample height 50 mm (higher samples with ext. anode via magnetic or croc. clips)
- I polishing & etching unit can be operated separately from control unit e.g. in lab fume cabinet
- I housing made from rust-free stainless steel (chemical-resistant coating) with drip tray
- I incl. connection set (electricity/water)

#### Equipment 2

External etching unit I etching beaker ade from stainless steel Volume 1200 ml

Automatic drive	0-60 V
ØxH	~ 120 x 120 mm
Weight	~ 0.5 kg
Order No · A6202004
